system
acne solution
by mesoestetic®

mesoestetic®

Since its founding, **mesoestetic Pharma Group** has stood out for its constant dedication and efforts in R&D, which provide new and efficient solutions to the unsatisfied needs of patients. The **mesoderma** range, developed in close collaboration with a group of well-known dermatologists, offers maximum effectiveness, quality and safety in the most advanced dermo-cosmetic treatments.

acne-peel system is this range's approach to the topical treatment of acne-prone and seborrhoeic skins.

Acne vulgaris is caused by androgen excess which increases keratinisation and follicular desquamation as well as the secretion of sebum. This obstructs skin pores and leads to inflammation as a result of the opportunistic action of the bacterial flora present in the skin, resulting in typical acne lesions, which include comedones, papules, pustules, nodules, scars and hyperpigmentation.

The formula of the product line incorporates the innovative **m.acne complex™** whose active ingredients create a synergy with cross-cutting effects on the different factors that trigger breakouts in acne-prone and seborrhoeic skin.

5- α REDUCTASE INHIBITION.

Reduces level of the hormone involved in **androgen excess** related to acne-prone skins.

CLEARs THE PILOSEBACEOUS CANAL.

Encourages keratolysis of an abnormally thick stratum corneum (horny layer) and **unblocks skin pores**.

SLOWS SEBUM PRODUCTION.

Controls excessive secretion of the sebaceous glands.

CONTROLS BACTERIAL PROLIFERATION.

Inhibits growth and reproduction of the **strains** making up the skin flora that may infect blocked pilosebaceous canals.

REDUCES EPIDERMAL RUBOR AND TUMEFACTION.

Reduces and soothes the intensity of the inflammatory process of **acneiform eruptions**.

SOFTENS POST-ACNE HYPERPIGMENTATION.

Mitigates hyperpigmented areas of skin after an episode of acne.

Multifactorial control of acne-prone and seborrhoeic skin.

Treatment in beauty salon

acne-peel system

Professional method for intensive treatment of acne-prone and seborrhoeic skin to perform in 5 sessions.

mesopeel azelan

50 ml

azelaic acid 20%
salicylic acid 20%

Peel with keratolytic, anti-comedone and sebum-regulating properties.

pH 1,5.

post-peel crystal fiber mask
