mesoestetic

DERMA TOLOGICALLY DEVELOPED & TESTED

imperfection control

Effective cream and serum imaging or retinol-free formula.

15 ml / 0.54 fl. oz.

mesoestetic®

Since its founding, mesoestetic Pharma Group has stood out for its constant dedication and efforts in R&D, which provide new and efficient solutions to the unsatisfied needs of patients. The **mesoderma** range, developed in close collaboration with a group of well-known dermatologists, offers maximum effectiveness, quality and safety in the most advanced dermo-cosmetic treatments.

acnelan is this range's approach to the topical treatment of acne-prone and seborrhoeic skins.

Acne vulgaris is caused by androgen excess which increases keratinisation and follicular desquamation as well as the secretion of sebum. This obstructs skin pores and leads to inflammation as a result of the opportunistic action of the bacterial flora present in the skin, resulting in typical acne lesions, which include comedones, papules, pustules, nodules, scars and hyperpigmentation.

The formula of the product line incorporates the innovative **m.acne complex™** whose active ingredients create a synergy with cross-cutting effects on the different factors that trigger breakouts in acne-prone and seborrhoeic skin.

5- α REDUCTASE INHIBITION.

Reduces level of the hormone involved in **androgen excess** related to acne-prone skins.

CLEARs THE PILOSEBACEOUS CANAL.

Encourages keratolysis of an abnormally thick stratum corneum (horny layer) and **unblocks skin pores**.

SLOWS SEBUM PRODUCTION.

Controls excessive secretion of the sebaceous glands.

CONTROLS BACTERIAL PROLIFERATION.

Inhibits growth and reproduction of the **strains** making up the skin flora that may infect blocked pilosebaceous canals.

REDUCES EPIDERMAL RUBOR AND TUMEFACTION.

Reduces and soothes the intensity of the inflammatory process of **acneiform eruptions**.

SOFTENS POST-ACNE HYPERPIGMENTATION.

Mitigates hyperpigmented areas of skin after an episode of acne.

Multifactorial control of acne-prone and seborrhoeic skin.

Clinic treatment

acnelan

Professional method for intensive treatment of acne-prone and seborrhoeic skin to perform in 3 sessions.

acnelan multifactor mask

3 x 10 ml jars

Ultra-concentrated descaling gel mask with predominately keratolytic and antimicrobial properties. pH 3,5.

- Captures seborrhoeic filaments.
- Exfoliates and deep cleans the pilosebaceous units.

pore sealing shield

3 x 3 ml single doses

Gel that acts as a protective shield.

- Prolong and maintain the effects of the active ingredients applied during treatment.
- Soothes and tightens the pores.

post-peel neutralizing spray

50 ml

A pH 8,6 solution to soften and neutralise the **acnelan multifactor mask**.

- Balances and soothes the skin.

Treatment precaution: given the composition and characteristics of **acnelan pack**, its use is recommended in skins with mild-moderated acne and with an exposition of **acnelan acne multifactor mask** not superior to 3 minutes, monitoring possible side effects such as an excessive irritation of the skin which can result in a frosting process and post-inflammatory hyperpigmentation (pay special attention to acne in inflammatory phase).

Home care treatment

Cleansing & purifying

purifying mousse

150 ml

Daily cleansing mousse to purify and cleanse acne-prone and seborrhoeic skin.

- Cleans impurities from the skin.
- Leaves a fresh and comfortable feeling.

Treatment cream

acne one

50 ml

Cream for daily treatment and control of acne-prone and seborrhoeic skin.

- Addresses the various factors that trigger acne-prone skin with a multifactorial, cross-cutting approach.
- Gives the skin optimal appearance and texture.

Focal treatment

imperfection control

10 ml

Specific, local treatment for emerging or rebellious acne breakouts.

- Quickly reverse the rubor and tumefaction caused by acneiform eruptions.
- Provides a modulated and progressive concealing effect.

coming soon

Intensive treatment

pure renewing mask

100 ml

Exfoliating and purifying facial mask for acne-prone and seborrhoeic skin for weekly use.

- Provides additional mechanical exfoliation for the elimination of skin impurities.

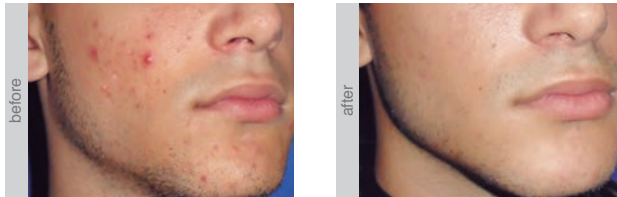

Progressive, long-lasting results

30 volunteers with acne-prone skin were included in a multicenter clinical follow-up efficiency and safety study conducted in 7 dermatological medical centers where **acnelan** clinic method were applied in combination with home care products.
