TREATMENT OF CHRONO-AGING AND HYPERPIGMENTATION  
OF EXTERNAL FEMALE DELICATE AREAS, AXILLAE,  
MAMMARY AREOLA AND PERIANAL AREA

The **intrinsic aging** occurs also in the covered areas and the menopause suddenly worsens its perception.

The **climacteric** is an event that now occurs in the middle of an active life and not – as it happened in the past – at its end.

The **active life** consists of all its aspects, including intimacy.

Suggest the **PRX-T<sup>®</sup>lady** for the intimate parts to your patients and help women with a discomfort that is often difficult to express.
